

ESRD Legislative and Regulatory Glossary

“Advocacy is a pillar of nursing. Nurses instinctively advocate for their patients, in their workplaces, and in their communities; but legislative and political advocacy is no less important to advancing the profession and patient care.” —American Nurses Association (n.d., para 1)

Through championing the nursing profession, nurses give a voice to the essential role they play in advancing access to high-quality, affordable care. With energetic participation in advocacy, every nurse can help the profession improve and move to higher levels. Becoming involved in advocacy may include such activities as reading articles about the subject, commenting on proposed rule making by the Centers for Medicare & Medicaid Services (CMS), participating in local or state initiatives, taking action to improve nephrology nursing practice, and much more. Pursuing an interest in any area of advocacy may also mean contending with acronyms and abbreviations that may be unfamiliar. The following is a quick reference and categorized list of such abridgements to help the nephrology nurse who wishes to become more active in the advocacy realm.
